Kelbari

Internship Program · 2026

🎨 Graphics Design internship.

A guided, portfolio-building track. Pick your tasks, build real projects, and share your work. Top performers can earn a Letter of Recommendation and a pathway to a job at Kelbari. One connected team for web development, digital marketing and graphic design, based in Bahawalpur, Pakistan.

Track guide & task cards
kelbari.net

Apply via the form in our
Kelbari LinkedIn post

Before you start

This checklist applies to every intern on every track. Complete it before submitting any task.

Profile & setup (do this first)

01 Complete your LinkedIn profile. If you need help, search “LinkedIn profile optimization and resume building” on YouTube and watch a tutorial before starting any project work.

02 Search “how to build a personal portfolio” on YouTube and watch a walkthrough — a simple portfolio makes your internship work easy to showcase.

03 Create your GitHub repository. Name it exactly: KELBARI (all caps). This single repository holds all your task submissions across the internship. Do not create a separate repo per task.

04 Connect your GitHub account and make sure your profile is public so mentors can review your work.

Per-task workflow (repeat for every task)

01 Step 1 — Review. Read the task card for your chosen task carefully. Understand the full feature checklist before writing a single line of code or starting a design.

02 Step 2 — Build. Develop your project, following the tech stack and requirements in the task card.

03 Step 3 — Push to GitHub. Commit your completed project to your KELBARI repository using this folder format, with no exceptions: KELBARI/[Track]-[Level or Task]-[ProjectName]/ — for example KELBARI/WebDev-L1-LandingPage/ or KELBARI/Python-Task2-BMICalculator/. Each folder must contain your source code, a README.md describing the project, and any relevant screenshots or output files.

04 Step 4 — Record a demo video. Record a short screen walkthrough of your finished project. Begin with a 2-second title card showing (1) your full name, (2) your track, and (3) the task title. After the title card, show the project working end to end — not just screenshots. For report-based tasks, narrate your document on screen.

05 Step 5 — Post to LinkedIn. Share your demo video in a LinkedIn post. Tag Kelbari and include the hashtag #kelbari, plus relevant domain hashtags (for example #webdevelopment, #datascience, #python, #cybersecurity, #internship).

06 Step 6 — Engage with peers. Watch the LinkedIn demo videos of at least two other interns from your cohort and leave a thoughtful comment on each — engage with their work, ask a question, or offer a constructive observation. Generic comments like “Great work!” don't count.

07 Step 7 — Submit. Submit your task through the submission form shared with you by Kelbari, including your GitHub repository link.

08 Step 8 — Evaluation. After the submission deadline, your work is reviewed. On successful completion you receive your Kelbari Completion Certificate and, where applicable, a Letter of Recommendation.

Key reminders

01 GitHub repo name must be exactly KELBARI (all caps) — any other name may cause your submission to be missed.

02 Follow the strict folder format KELBARI/[Track]-[Level or Task]-[ProjectName]/ — inconsistent naming delays review.

03 The first 2 seconds of every demo video must show your full name, track and task title as a static frame.

04 Thoughtful comments on at least two fellow interns' videos are required for completion.

05 Check your track's completion rule below and don't under-submit.

06 All work must be entirely your own. Plagiarism or copied work leads to cancellation of your submission and certificate.

What you receive from Kelbari

01 Guidance and mentorship from the Kelbari team throughout the program.

02 A Certificate of Completion once you finish your track's requirements.

03 For top performers: a Letter of Recommendation, a letter of appreciation, and a pathway to a job or paid role at Kelbari and related opportunities.

🎨 Graphics Design

Completion rule. Complete at least 4 of the 5 tasks below.

TASK 1

Posters & Fliers

Objective. Design at least 2 digital posters or promotional fliers for a real or fictional event, product launch or awareness campaign.

```
Tech: Canva, Adobe Illustrator, Figma or Photoshop (your choice)
```

FEATURE CHECKLIST

- [ ] At least 2 distinct designs (different events or themes)
- [ ] A defined palette per design (3–4 colours for cohesion)
- [ ] Clear visual hierarchy: headline, subheadline, body, CTA
- [ ] At least one custom graphic element per design (icon, shape or illustration)
- [ ] Correct dimensions: A4 for print, or 1080×1080px for social
- [ ] Legible text against its background (check contrast)
- [ ] Exported as high-resolution PNG or PDF

> **Where to learn:** Browse Behance (search “poster design” or “event flier”) for inspiration. Use Unsplash for royalty-free images and Google Fonts for type. Canva users: study Canva Design School tutorials.

TASK 2

Logo Design

Objective. Design a professional, minimalist logo for a fictional brand that communicates its identity clearly.

```
Tech: Adobe Illustrator (preferred for vector), Figma or Canva
```

FEATURE CHECKLIST

- [ ] Original concept — not a template modification
- [ ] At least 3 variants: full colour, monochrome black, and reversed (white on dark)
- [ ] Vector format (SVG or AI) so it scales cleanly
- [ ] Minimalist philosophy (keep it simple)
- [ ] Intentional typography (custom letterforms or a well-chosen pairing)
- [ ] A 2–3 sentence design rationale for your colour and symbol choices, in your LinkedIn post
- [ ] Exported as transparent PNG at 1000×1000px minimum

> **Where to learn:** Search “logo design process tutorial Adobe Illustrator” on YouTube. Use Coolors.co for palettes. Browse Behance (search “minimal logo design”). Read about logo principles on the Nielsen Norman Group site.

TASK 3

Business Card Design

Objective. Design a professional double-sided business card for a fictional person and company, showing mastery of typography, whitespace and brand consistency.

```
Tech: Adobe Illustrator, Figma or Canva
```

FEATURE CHECKLIST

- [ ] Front: logo, full name and job title
- [ ] Back: phone, email, website and 1–2 social handles
- [ ] Standard size: 85mm × 55mm
- [ ] At most 2 font families (heading + body)
- [ ] Deliberate whitespace — not crowded
- [ ] Consistent with a brand identity (optionally reuse your Task 2 logo)
- [ ] 3mm bleed on all sides for print
- [ ] Exported as a print-ready PDF and a preview PNG

> **Where to learn:** Search “business card design tutorial Figma/Canva/Illustrator” on YouTube. Use Fontpair.co for pairings. Browse Behance (search “business card design 2026”). Use templates for dimensions only — your design must be original.

TASK 4

Infographic

Objective. Create a compelling infographic that presents data, a process or a set of facts clearly and engagingly.

`Tech: Canva, Venngage, Adobe Illustrator or Figma`

FEATURE CHECKLIST

- [ ] A clear topic/title at the top
- [ ] At least 5 distinct data points or sections
- [ ] At least 3 types of visual element: icons, charts, diagrams or progress bars
- [ ] Consistent colour scheme (max 4 colours)
- [ ] Visual flow that guides the eye logically
- [ ] All statistics cited in small text at the bottom
- [ ] Standard size: 800×2000px (tall portrait)
- [ ] Exported as high-resolution PNG (150 DPI minimum)

> **Where to learn:** For data, use Statista or Our World in Data (free and citable). Search “how to make an infographic Canva tutorial” on YouTube. Browse Visual.ly for examples.

TASK 5

Magazine or Brochure Layout

Objective. Design a 4–6 page magazine spread or tri-fold brochure for a fictional brand, showing multi-page layout and print principles.

`Tech: Adobe InDesign (preferred), Figma or Canva (multi-page)`

FEATURE CHECKLIST

- [ ] Minimum 4 pages (or a 6-panel tri-fold)
- [ ] Consistent master elements across pages (page numbers, header/footer, column grid)
- [ ] At least 2 full-bleed image pages
- [ ] Body copy in a legible serif or sans-serif at 10–12pt with good line spacing
- [ ] At least one distinctly styled pull quote
- [ ] Royalty-free images (Unsplash or Pexels)
- [ ] A consistent brand palette
- [ ] Exported as a multi-page PDF

> **Where to learn:** Search “magazine layout design tutorial Adobe InDesign” or “brochure design Canva tutorial”. Read about grid systems in graphic design. Browse Behance for references.
